- ✉ 18 Reynard Terrace  
Conifer Grove

## SKILLS

---

- Software writing using programming languages including Java, C, C++, Python, .NET (C#, ASP.NET)
- Web development and use of web frameworks/tools like HTML, CSS, Javascript, React, Angular, jQuery, Node / Express, Sass, Redux, Umbraco.
- Software Version Control Systems Used:
  - TortoiseSVN
  - Github

## PROJECTS

---

- Completed sites for Whai, StarJam, Tempo Dance Festival, CSG, Mastip, Urban Athlete, and more.
- Built software for The Dealership Network, connecting with multiple APIs to bring in car stock from dealerships around the country.
- Jack Boyd CV, made completely out of technologies I taught myself in order to expand my knowledge base (React, Redux, Webpack).
- Personal Project – With a web developer friend of mine, concept is to make an information hub where you can access all your personal info for uses across the internet (info, passports/license photos, shopping info, go to security questions / answers etc).

# Jack Boyd

## CURRICULUM VITAE

### PERSONAL STATEMENT

---

I am a developer who is looking to make an impact in the workplace and use my drive to create complex products of the highest quality. I am good at problem solving and enjoy building new skills to further my knowledge in software development industry.

### WORK EXPERIENCE

---

#### .NET Developer

*Feb 2018-Present*

Phil Vialoux, System 7

Using Umbraco, Bootstrap HTML Templates and the .NET framework, I mainly create high quality websites for client businesses, with additionally making app 'proof of concepts' and full stack custom web applications. I also oversee the support email and make sure jobs coming through get processed, completed, and communicated to the customer. Because I am comfortable talking to clients through email, phone, or in person, I establish relationships with clients whose projects I am working on and communicate with them through planning / development and rework.

I am in charge of the Scrum process we run. Because our team only includes 3 developers, we aren't implementing a fully version on scrum. I make sure everyone on the team has everything they need in order to complete their sprint, and that they are on track to do so.

### EDUCATION

---

#### Bachelor of Mathematical Sciences (BMath)

*2015-2017*

Majoring in Computer Science, AUT (Auckland University of Technology)

### HOBBIES & PERSONAL ACHIEVEMENTS

---

#### Music

Grade 7 in Piano, Trinity Piano School

NZ Modern School of Music Competition

- 2 gold, 3 silver, 2 bronze in both guitar and piano over 3 years
