SKILLS

→ Commercial development using Java, ASP.NET, C#, HTML, CSS, Sass, Javascript, jQuery, React, React Native, Redux, and SQL

→ Interpersonal skills like customer service, leadership & project planning

→ Software Version Control Systems like TortoiseSVN & Github

PROJECTS

- Alltranz - Custom software to manage drivetrain and transmission information relating to product data pulled from an external API. Built with ASP.NET, C# and a SQL Database.
- Rentfit - Custom portal to manage properties reported on, with every category of report broken down into detailed actions showing what passes and what fails inspection. Data is dynamically turned into various types of PDF reports. Built with React, C#, and an SQL database
- OBC - Membership app for Android and iOS that gives members access to discounts, live webcam feeds, and event details. Built with React Native, Redux, C# and an SQL database.
- Accessibility NZ App - Personal project allowing users to find locations with the accessibility features they require in the category they desire. Users have the ability to filter based on their requirements, and can add new locations with a small review when visiting a location not on the map. Built with React Native, Redux and Firebase. Super admin portal built with React.

Jack Boyd

CURRICULUM VITAE

PERSONAL STATEMENT

I am a developer who is looking to make an impact in the workplace and use my drive to create complex products of the highest quality. I am good at problem solving and enjoy building new skills to further my knowledge in software development industry.

WORK EXPERIENCE

Developer   *Feb 2018-Present*

Phil Vialoux, System 7

System 7 is a startup that provides primarily other New Zealand start-ups with digital solutions, ranging from websites, custom eCommerce platforms, mobile apps, and intranet systems.

I've used .NET, C# and web technologies (HTML, CSS, Sass, Javascript and jQuery) to build our CMS based websites and eCommerce platforms. I've used React and Redux to build the front end to intranet systems, connecting them to Firebase. I've used React Native and Redux to build native Android and iOS applications, also connecting them to Firebase.

During my time working for System 7, I have also been in charge of customer support, taking care of customer needs via email and a phone desk.

EDUCATION

Bachelor of Mathematical Sciences (BMSc)   *2015-2017*

Majoring in Computer Science, *AUT (Auckland University of Technology*

HOBBIES & PERSONAL ACHIEVEMENTS

Music

Grade 7 in Piano, Trinity Piano School

NZ Modern School of Music Competition

- 2 gold, 3 silver, 2 bronze in both guitar and piano over 3 years
